=== SECURESCAN Report ===
Target: https://google-gruyere.appspot.com/
Generated: 2026-10-25T16:53:22.254323

=== Server Headers ===
Cache-Control: no-cache
Pragma: no-cache
Content-Type: text/html; charset=utf-8
x-cloud-trace-context: f39326d54c3712f58cce823dccc4d485
Date: Sun, 25 Oct 2026 11:22:51 GMT
Server: Google Frontend
Content-Length: 11506
Alt-Svc: h3=":443"; ma=2592000,h3-29=":443"; ma=2592000

=== Security Headers Check ===
X-Frame-Options: Missing - Helps prevent clickjacking
Content-Security-Policy: Missing - Prevents script injection
Strict-Transport-Security: Missing - Forces HTTPS
X-Content-Type-Options: Missing - Prevents MIME-sniffing
Referrer-Policy: Missing - Controls referrer header information

=== Discovered Paths ===
/robots.txt - 200

=== Banners (common ports) ===

Port 80: HTTP/1.0 404 Not Found
Content-Length: 272
Content-Type: text/html; charset=UTF-8
Date: Sun, 25 Oct 2026 11:23:05 GMT
Port 443: none
Port 8080: none
Port 22: none

=== Open Ports ===
80, 443

=== TLS Info ===
Protocol: TLSv1.3 Cipher: ('TLS_AES_256_GCM_SHA384', 'TLSv1.3', 256)
Cert notAfter: None

=== Risk & Threat Meter ===
Score: 29 Classification: Low
Reasons:
 - Missing security headers (5) — add HSTS, CSP, X-Frame-Options, X-Content-Type-Options
 - Discovered sensitive/interesting paths: robots.txt
 - Other open ports: [80, 443]

Why these matter:
 - Missing headers allow clickjacking, XSS or content sniffing attacks.
 - Open ports can expose services; ensure only required services are accessible and updated.
